FOR IMMEDIATE RELEASE

Rimkus Consulting Group Expands Operations with Oklahoma Office

HOUSTON, TX (Nov. 6, 2007) – Rimkus Consulting Group, a global leader in forensic consulting services, today announced the recent opening of its Oklahoma City office. This office enables Rimkus to better serve customers in and around Oklahoma with services such as fire cause and origin; property damage evaluations; vehicle accident reconstruction; and expert witness testimony; as well as catastrophic event analysis services which, in many cases, require a local presence.

“The ability to quickly discover what happened and why, from the cause and origin through the extent of loss, often requires a timely response that can occur only if forensic experts are nearby,” said Richard Storm, regional manager. “Oklahoma City provides Rimkus with an ideal, centrally located office that can rapidly respond to client needs and provide more immediate results.”

Throughout 2006, Rimkus established a presence in Oklahoma by servicing clients and claims with resources from the company's North Texas Regional Office located in Dallas. The Oklahoma City office provides professional consulting services to insurance companies, law firms, corporations and government agencies.

Interested parties may contact the Oklahoma City office at:
