Background

Mr. Li graduated from University of Miami, Florida, where he earned his B.S. degree in Architectural Engineering. He is a registered professional engineer in the states of Florida and Wisconsin, with expertise in structural design, engineering management, project management, implementing quality control, and on-site structural inspection.

Mr. Li has over 19 years of experience in:

- Overseeing projects from planning, design, and to construction phase, including new and existing construction for residential, commercial, and industrial buildings;
- Managing design teams to ensure quality of design and coordination between all disciplines; and
- Utilizing a wide range of structural materials such as reinforced concrete, steel, masonry, wood, post-tensioned slab, and pre-stressed concrete, with focus in compliance to local building codes.

In addition, he is experienced in providing on-site inspection for various structural damage, ranging from age-related building deterioration, construction defect, to engineer design error. Mr. Li is also experienced in providing reports and repair plans stating the cause, extent, and repair recommendations to remedy defects.
