Background

Ms. Goulet holds a B.S. degree in Nuclear Engineering. Ms. Goulet has 9 years of experience in project management, delay analysis, and claims assessment. As a Senior Consultant, Ms. Goulet has experience in multiple industries with various types of delay claims and provides thorough and concise summaries of findings and analyses of claims for clients.

Ms. Goulet's areas of expertise are construction Subcontractor Default Insurance (SDI) claims, project schedule development, forensic delay analysis of construction claims using various industry standard critical path methods to quantify delay and determine causation. She has developed technical analyses involving evaluation of contract scope discrepancies, change order entitlement, and delays due to non-default related matters.

Education

- Nuclear Engineering, B.S.: Rensselaer Polytechnic Institute
