## Background

Mr. Sanders is a 1998 graduate of Auburn University and holds a Bachelor of Science degree in Civil Engineering. Mr. Sanders is a licensed Professional Engineer and licensed Certified General Contractor in the State of Florida. Mr. Sanders has experience in the areas of design, cost estimating, scheduling, project and construction management, contract administration, construction, renovation, and evaluation for residential, commercial, educational, parks and recreation, roadway, and governmental buildings and projects.

Mr. Sanders has extensive experience in residential structural design and plan preparation, residential and commercial construction from permitting through completion, contract administration and project management for governmental office buildings, project oversight and contract administration for both construction managers and design teams for large educational projects, and design, plan preparation, permitting, and project management for large public works projects such as roads, drainage systems, parks, and athletic fields.

As a forensic engineer, Mr. Sanders performs inspections and cause and origin analysis of storm-related damage, structural fire damage, water damage, construction defects, and structural design defects. These inspections and analyses encompass commercial, residential, civic, religious, hospitality, and multi-residential building types and include floor failures, building settlement and/or collapse, moisture intrusions, wall and roof system failures, building envelope and cladding system deficiencies and failures, and fenestration component deficiencies and failures.
